CAREER SUMMARY

Full-stack web-developer with strong time management and communication skills. Can utilize the MERN stack, as well as multiple front-end libraries, like Bootstrap and Materialize. A continuous learner and self-starter always looking for opportunities to improve independently and from colleagues.

TECHNICAL SKILLS

- HTML5, CSS, Javascript, JQuery, Node, Express, MySQL, React, and MongoDB

PROJECTS

- **U-Hike:** A front-end web-application made with Javascript. This web-application makes API calls to gather information on the user's location, the closest trails to your location, and the directions from where you are to the trail you select.
- **Nerd-Box:** My first project utilizing both Javascript/JQuery and MySQL. Utilizing Sequelize, I created a login feature using passport and BCrypt for safe storage of user emails/passwords.
- **Titles:** First full-stack MERN application. Allows the user to select a "title" that will filter the users live-feed. The user can also use the title to search for articles that are relevant to that title.
